Wooden Star

A very easy-to-create, memorable star made out of simple popsicle sticks and glue.

What you need

- 10 popsicle sticks (colored or plain)
- Hot glue gun or regular glue
- Length of fishing line
- Paint
- Markers
- Glitter

How to make it

Draw up a template of a star using popsicle sticks. Place one popsicle stick inside one line then add some glue to the top. Position second stick on this. Continue previous step until all 10 sticks are in place. Decorate as desired using paint, markers, glitter or any other supplies you may have on hand.

Attach some fishing line to one point for hanging.
